

INLINE NSF-CERTIFIED CARBON FILTERS

SpiroPure Inline Carbon Filters offer NSF-certified premium coconut shell carbon to provide you with better tasting water for your refrigerator, ice maker, reverse osmosis system, coffee maker, water cooler, and more. We offer the inline filters in different connection options, including 1/4" FNPT, 3/8" QC, or 1/4" QC connections.

- Made with 5 Micron NSF 42 certified coconut shell granular carbon that effectively reduces chlorine taste and odor from water
- Coconut shell carbon is recognized as the best filter media for producing better tasting drinking water
- 2" x 10" cartridge lasts up to 1,500 gallons, with recommended replacement every 6-12 months depending upon water quality and usage
- Offered in a 1/4" FNPT, 3/8" Quick-Connect, or 1/4" Quick-Connect to meet your inline filtration needs
