

POLYPHOSPHATE ANTI-SCALE FILTERS

SpiroPure polyphosphate anti-scale filter cartridges not only help prevent scale, but also assist in preventing corrosion in plumbing pipes, fixtures, and appliances. Food-grade, slow dissolving clear polyphosphate beads can also help reduce previously formed scale built-up in plumbing where water is consistently flowing, such as in pipes and water heaters. Salt-free filter cartridges are practically maintenance free with no need to purchase salts, no regeneration cycles, and no harmful wastewater. Simply replace the cartridge every 6-12 months.

- Made with food-grade slow dissolving clear polyphosphate beads
- Inhibits the formation of scale deposits and rust from forming in pipes and on fixtures
- Creates a protective coating to help protect against acidity, alkalinity, hardness, chloride, and other causes of corrosion and hard water
- Polyphosphate dissolves metals and sequesters them (suspends them within in the water) to prevent unwanted discoloration and staining, such as from iron, manganese, calcium, aragonite, and magnesium in water
- Does not require messy sodiums, timely regeneration cycles, and does not produce harmful wastewater
- Replace filter every 6-12 months for best results
- Cartridges have a temperature rating of 39°F - 125°F

FILTER DETAILS CHART

Size	Model Number	Temperature Rating	Case Dimensions	Case Weight
2.5" x 10"	SP-PH-10	39°F - 125°F (4°C - 52°C)	13" x 10 1/2" x 10"	27 lb
2.5" x 20"	SP-PH-20	39°F - 125°F (4°C - 52°C)	21" x 10" x 7"	32 lb
4.5" x 10"	SP-PH-BB	39°F - 125°F (4°C - 52°C)	15" x 11" x 10 1/4"	29 lb
4.5" x 20"	SP-PH-20BB	39°F - 125°F (4°C - 52°C)	21" x 10 1/4" x 10 1/4"	43 lb
