

5-STAGE REVERSE OSMOSIS WATER FILTRATION SYSTEM

SpiroPure reverse osmosis systems utilize 5 stages of filtration to provide a complete filtration performance for cleaner, clearer water for your home. The system comes with everything you need for a quick, easy under sink installation, including the option to have no faucet or to choose from 5 different attractive finishes. With the advice of licensed plumbers, our 1/2" Feed Water Adapter comes with a 3/8" reducer so you can avoid the hassle of seeking out additional parts.

- Advanced 5-stage filtration includes sediment, GAC carbon, carbon block, RO membrane, and post carbon polishing filters in one undersink system
- RO membrane provides effective filtration down to 0.0001 micron of unwanted contaminants such as bacteria, cysts, TDS, heavy metals, and much more
- SpiroPure offers a 75 gpd RO membrane for a higher flow compared to the usual 50 gpd offered by other RO systems on the market
- Choose a system without the air gap faucet or select a system with one of the five available stylish faucet finishes with an optional air gap
- Find all the components you need for a quick, successful install, including color-coded tubing, quick connect fittings, housing wrenches, teflon tape, a tube cutter, and more.
- High quality parts and quick connect fittings assist in preventing leaks with proper installation. The included Leak Stop Valve shuts off the system at the first sign of water to further help avoid costly water damages

FILTER DETAILS CHART

Model Number	Faucet Finish	Number of Stages	Temperature Rating	Replacement Filter Set
SP-RO100	No Faucet	5	39°F - 125°F (4°C - 52°C)	SP-RO125
SP-RO100-AB	Antique Bronze	5	39°F - 125°F (4°C - 52°C)	SP-RO125
SP-RO100-BK	Black	5	39°F - 125°F (4°C - 52°C)	SP-RO125
SP-RO100-CM	Chrome	5	39°F - 125°F (4°C - 52°C)	SP-RO125
SP-RO100-GD	Gold	5	39°F - 125°F (4°C - 52°C)	SP-RO125
SP-RO100-NK	Nickel	5	39°F - 125°F (4°C - 52°C)	SP-RO125
