

## MULTI-STAGE RV/MARINE INLINE WATER FILTER

The SpiroPure SP-RV100 Multi-Stage RV/Marine Inline Water Filter with included flexible hose protector to help secure and protect the filter to water supply connection from damaging kinks. SP-RV100 offers sediment, carbon, and water softening descaler media in one single filter cartridge to ensure your RV has better drinking water, showering water, and more.

- Provides 3 stages of sediment, carbon, and descaler media for a complete water filtration experience for your RV
- 1500 gallon capacity filter lasts for one season and is for outdoor use in recreational vehicles and portable water systems only
- Filters at a 1 micron rating at 0.75 GPM with a temperature rating of 34°F - 100°F (1°C - 38°C) and a maximum pressure rating of 80 psi. Please note that if the water pressure exceeds 80 psi, you will need to install a pressure limiting valve.
- Also available as the SP-RV100-2PK, which includes two of the SP-RV100 cartridges in a convenient, money-saving multi-pack. Please note that SP-RV100-2PK does not include the flexible hose protector.

### FILTER STAGES

- **Stage 1:** Premium polypropylene media filters water of sediment
- **Stage 2:** Specialized German-made catalytic carbon reduces impurities like chlorine, heavy metals, PFAS, PFOAS, and more more effectively than other carbon filters
- **Stage 3:** Cutting-edge German-made descaler media is a salt-free solution not hard water buildup that not only prevents scale, but also reduces previously formed scale from plumbing pipes

### CONTAMINANT REDUCTION

- Arsenate
- Arsenide
- Bad taste & odor
- Chloramine
- Chlorine
- Chromium
- Copper
- Cyanide
- Fluoride
- Heavy metals
- Hydrogen sulfide (sulfur odor)
- Iron
- Lead
- Manganese
- Mercury
- Organics
- PFAS, PFOA, & PFOS
- Phenols & p-nitro phenol
- Scale buildup
- Sediment
- Selenium
- Tannins and lignin
- Trihalomethanes (THMs)
- Turbidity
