

AIR GAP DRINKING WATER FILTER FAUCETS SP-FC210 SERIES WITH WING NUT INSTALLATION

SpiroPure Air Gap RO Faucets offer a pre-installed, optional air gap for compatibility with your Reverse Osmosis or non-RO undersink water filter system. The faucets have a sleek, contemporary design offered in four attractive finishes of Matte Black, Polished Chrome, Brushed Gold, and Brushed Nickel to add a stylish touch to any space. Our kitchen faucets are heavy duty, lead-free, and drip-free to assist in delivering clean, healthy water at the twist of the 90-degree single-lever handle. The 360 degree spout allows for versatility to fill cooking pots, water bottles, and more.

- Optional air gap allows you to install with an RO system or to bypass the air gap for use with non-RO undersink water filter systems
- Lead-free, drip-free, heavy duty faucet composed of premium, long-lasting materials
- Attractive contemporary design offered in four finishes, including matte black, polished chrome, brushed gold, and brushed nickel
- Included wing nut allows for a faster, simpler install compared to traditional air gap faucet installations with standard nut systems
- Includes 1/4" and 3/8" quick-connect adapters for versatile installation
- The air gap is pre-installed for easier setup and install
- A 90 degree single-lever handle and 360 free swivel spout allow for ease of use
