

DUAL-GRADIENT MELT-BLOWN SPUN POLYPROPYLENE SEDIMENT FILTERS

The SP-DD Series of SpiroPure sediment filters utilizes dual-gradient polypropylene filter media to provide a higher dirt holding capacity and excellent chemical resistance. The dual-gradient filtration makes them a perfect choice for removing sediment from all residential, rural, municipal, and commercial applications.

- Reduces sediment for a variety of water filtration needs, including for all residential, rural, municipal, and commercial applications
- Available in nominal sizes of: 10x4.5 and 20x4.5
- Available nominal filtration ratings of: 1, 5, 10, 20, 25, and 50 microns
- Temperature rating of 40°F - 140°F (4°C - 60°C)
- Dual-gradient design combines pre- and post-filter features, reducing the need for a step-down filtration system
- A higher micron outer gradient layer reduces the load on the inner, smaller micron layer for more efficient filtration and a much higher dirt-holding capacity and cartridge life than similarly sized cartridges

Displayed data shows the performance of 10" filter cartridges. To estimate pressure drops for 20", 30", and 40" cartridges, divide the psi above 2, 3, and 4 respectively at the same flow rate.
