## POLYPROPYLENE STRING-WOUND SEDIMENT FILTERS

SpiroPure SP-WP series string-wound polypropylene sediment filters capture fine sediment, including rust, sand, and scale. The sediment filter cartridges reduce sediment for a wide range of applications, including municipal, well water, and many industrial fluids. The polypropylene cord is wrapped in a precise pattern around a durable polypropylene core that creates a larger surface area for a higher dirt holding capacity and increased efficiency.

- Reduces fine sediment particles from a variety of fluids
- Available in nominal sizes of: $10 \times 4.5$ and $20 \times 4.5$
- Available nominal filtration ratings of: $1,5,10,25,50$, and 100 microns
- Made with string wound polypropylene filter media
- Temperature rating of $40^{\circ} \mathrm{F}-165^{\circ} \mathrm{F}\left(4^{\circ} \mathrm{C}-74^{\circ} \mathrm{C}\right)$

## FILTER DETAILS CHART

Displayed data shows the performance of $10^{\prime \prime}$ filter cartridges. To estimate pressure drops for $20^{\prime \prime}, 30^{\prime \prime}$, and $40^{\prime \prime}$ cartridges, divide the psi above 2,3 , and 4 respectively at the same flow rate.
